

As an American who is guaranteed freedom of speech, I am greatly opposed of the proposed rule changes. As much as I would love to see the filth that out there removed from the radio, I am greatly against the proposed changes. These changes would only hinder shows and music that want to promote morals and Christianity. The way these rules are set up, boards would be allowed to control radio. Anti-Christian and anti-Republican boards would basically be allowed to remove Christian music/talk and Republican talk from the air waves. I see this move as the far-left trying to silence the conservative majority while allowing themselves the opportunity to cram the left-wing agenda down the throats of the people. If this passes, the people will speak through their vote and remove those in favor of these regulations from office.
